?   **Are you using Google Chrome, Mozilla Firefox, Safari, or Opera instead of Internet Explorer?**

Please read before proceeding to the list of forms and opening a fillable form

Check your JavaScript settings!
- The fillable forms on the AZDOR website use JavaScript to perform calculations.
- The forms were designed to work on Internet Explorer 7.0 (and above) and Adobe Reader 7.0 and above.
- The forms **will** work on other web browsers and PDF apps, but you need to confirm that JavaScript is enabled.
- Your web browser's Help file has directions for enabling JavaScript.

How your web browser affects your ability to use fillable forms:
- Popular alternate browsers (Chrome, Mozilla Firefox, Safari, Opera) disable JavaScript for security reasons.
- Since our fillable forms require JavaScript, they will not work properly, even though they *may* appear to be ok!
- If your browser disables JavaScript, consult your browser's Help file for enabling JavaScript.

How your PDF viewer affects your ability to use fillable forms:
- Our fillable forms are PDF forms designed to work with Adobe Acrobat Reader (version 7.0 and above).
  + This ensures that the dynamic content fields and calculations on our fillable forms work as intended.
  + Most computers today have Adobe Acrobat software as the default PDF reader (Apple does not).
- Apple computers use Preview software, which does not support all of the functions within our forms.
- If you are using a computer that does not have Adobe Acrobat Reader as the default PDF reader, you will need to download and/or set it as the default PDF reader.
- Access the Adobe website (http://www.adobe.com) for directions on downloading Adobe Acrobat Reader.

Need more help? If you are still experiencing problems using our fillable forms, please contact the Arizona Department of Revenue (webmaster@azdor.gov) to report your problem.
